

James Liao is Co-founder and CTO of Canopy Wave, an AI company leading the automation and innovation to the world-wide data center infrastructure. Prior to founding Canopy Wave, James was Founder and CEO of Pica8 (acquired by FS.com) for 12 years, leading the SDN paradigm shift from the legacy networking industry. Before Pica8, James also served as the founding engineer of Woven Systems (acquired by Fortinet) and 3UP Systems (acquired by Inventec). James has a proven record in infrastructure innovation and disruption.

Born in Taiwan, James holds a bachelor degree in CSIE from National Taiwan University and a master degree in Computer Science from Stanford University.
